

ANNEX D · RECEPTION AND KEY STAGE 1

In development, and therefore not part of the offer.

A game and a family resource. Neither is part of what a school signs up for, neither is finished, and neither is in the price.

What is not part of what your school signs up for

Nothing on this page should influence your decision about the seven-week programme. It is here so you hear the limits from us now rather than finding them later, and so nobody can say we implied more than exists.

Item	Status	What that means
The Silverton game	IN DEVELOPMENT	Not tested with children. Not part of the pathway, the price or any report. It gathers no data and we make no claim for it. It appears in no quotation and no sponsor agreement
A public family page	NOT LIVE	Does not exist and is not promised. Two things block it: a purchase route aimed at a child would breach clause 2 of our own Ethical Sponsorship Charter, and the intellectual property deed is unsigned. Where it survives in older material of ours, that material is wrong
Continued-learning packs	AVAILABLE NOW	Real, free, and refreshed each term. Shared with your school by link. No purchase route, no child account, no data collected
The full seven-week sequence	NOT YET COMPLETED END TO END	The Spark is the settled part and has been delivered. The complete seven-week sequence has not yet run a full cycle , so your class would be among the first

How to read this annex. If an item above is not marked available now, treat it as though it does not exist when you decide. **We will not raise it in a sponsor conversation, put it in a quotation, or count it in any report.** If any of it becomes real we will tell you in writing before it touches your school, and you will be free to ignore it.

What we removed from live documents in August 2026, and where it survived. A family page that does not exist was described as though it did, and a set of percentages was withdrawn after we found an arithmetic error in them. The full record of both, including the exact places the old wording is still sitting in our own older files, is in Annex B rather than here, because it is a record of our method rather than a factor in your decision.
